Information Disclosure Statement

1. The information disclosure statement filed 1/31/2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1 and 4, the phrases "the headspace" and "the volume of dissolved gas" lack proper antecedent basis.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over The Japanese Publication No. JP02000281147 (hereinafter JP'147) in view of The Japanese

Publication No. JP411292151 (hereinafter JP'151) or Myers (4,515,266). To the extent that the Examiner can determine the scope of the claims JP'147 discloses a packaged container containing an ocular perfusion/washing solution comprising a gas permeable container (1, 2), a gas impermeable packaging member (3) for holding the gas permeable container and interspace (4) between the container and the packaging member having a volume appears to be at least 4 times of the total of the volume of the headspace in the container. The interspace is filled with a carbon dioxide gas atmosphere and a pinhole detecting agent (5)(see abstract). JP'147 also discloses the other limitations of the claims except for the interspace comprises a mixture of gas atmosphere of carbon dioxide and at least one species selected from helium and neon.

JP'151 shows a packaged container (1, 2, 3, 5) having an interspace between the container (2) and packaging member (1) and the interspace contains an inert gas/inactive gas such as nitrogen, helium, neon and argon. Myers suggests a bag (14) for holding goods (12) including a preservative gas such as nitrogen, argon, helium, carbon dioxide or mixtures thereof (column 2, lines 13-35). It would have been obvious to one having ordinary skill in the art at the time the invention was made in view of JP'151 or Myers to modify the packaged container of JP'147 so the interspace comprises a mixture of gas atmosphere of carbon dioxide and at least one species selected from helium and neon to provide longer shelf life for the packaged container.

Claim 4 is drawn to the obvious method of using the packaged container of JP'147 as modified.

Allowable Subject Matter

6. Claims 2, 3 and 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
